Skin

Maximum effect

Dermaxin is specially developed for the regeneration of irritated and damaged skin. It is a herbal alternative, without cortisone and perfectly suited for postoperative use and long-term treatments.

Is an ointment based on essential oils for skin care, **WITHOUT CORTISONE**.

Thanks to its unique recipe, the plants can develop their potential and we can take full advantage of all their properties.

Dermaxin gives the skin a calming feeling, relieves itching, is very moisturizing and ideal for all irritated and damaged skin areas.

Dermaxin is a colorless product with a pleasant odor.

- ✓ PROTECTIVE
- ✓ REGENERATING
- ✓ CARING
- ✓ SOOTHING

WITH THE POWER OF

Marigold

Tea tree

St. John's wort

Dermaxin combines protective, caring and soothing aspects. This results in a very wide range of application areas.

Dermaxin achieves this on a plant-based basis and without any cortisone.

Application areas:

- Irritated and itchy skin areas.
- Damaged and sore skin areas.
- Dry, rough and flaky skin.

Advantage over other products:

- Purely herbal ingredients, **WITHOUT CORTISONE**, ideal for long-term treatments.
- Patients licking the product is not a problem.
- **Dermaxin** can be applied on open wounds, protects and helps the skin to regenerate, from the inside out, preventing the formation of scabs.
- The insect repellent effect prevents contamination by flies and other insects in the treated areas. Therefore, we recommend to let the affected areas recover at the fresh air **WITHOUT A BANDAGE**.
- High hydration of irritated and damaged skin. restores the elasticity and suppleness of the skin.
- **Dermaxin** is a colorless product with a pleasant perfume.
- **Dermaxin** is for daily treatment. Due to the light sensitivity of essential oils, avoid excessive exposure to sunlight or only apply in the evening hours.

Packing units
